

A close-up photograph of a person's hand firmly gripping the handle of a wheelchair. The wheelchair is positioned on a concrete ramp with visible steps. The background is slightly blurred, showing a chain-link fence on the left and the ramp's surface. The overall scene conveys a sense of stability and support.

AlumiRamp

LANDSCAPE COLLECTION

WE MAKE IT COLORFUL

The ALUMILITE LANDSCAPE COLLECTION has all the features of our standard ALUMILITE series with durable powder coated finishes to enhance your home.

Available in four colors designed to blend with natural materials such as slate, brick, wood or concrete.

ARMADA SYSTEM

WE MAKE IT LAST

The ARMADA SYSTEM is a residential modular ramp which can easily be moved or reconfigured if you have to relocate.

Made of anodized aluminum, it will remain good looking through years of use. This system complies with ANSI and ADA guidelines.

ALUMILITE

WE MAKE IT SAFE

The ALUMILITE solid is ideal for use as a short fixed ramp or for temporary needs. All welded aluminum construction with a permanent non-skid surface.

When more portability is needed the ALUMILITE folding is recommended.

READY RAMP

WE MAKE IT PORTABLE

The READY RAMP is ready when you are. Unfolds to its full size in 3 easy steps. Folds compactly for storage. Construction is welded aluminum with a black non-skid surface.

THRESHOLD RAMP

WE MAKE IT CONVENIENT

Our low profile aluminum THRESHOLD RAMP is ideal for use at doorways and thresholds from 1" to 4" in height. The 2" top lip seamlessly covers the existing threshold for a smooth transition and adjusts to varying heights. The welded construction and permanent skid resistant surface allow these ramps to be used inside or outside.

RUBBER THRESHOLD RAMP

WE MAKE IT EASY

The RUBBER THRESHOLD RAMP is made of recycled rubber and can be used for thresholds up to 2 1/2". This design is especially useful for sliding doors or doors that fit tightly in their frame as it does not cross the threshold. All sizes come with tapered edges and a molded slip resistant surface.

QUICK RAMP SYSTEM

WE MAKE IT AFFORDABLE

AlumiRamp's QUICK RAMP SYSTEM is a pre-engineered kit designed to combine the economic savings of wood with the strength and ease of our modular aluminum systems. With these kits, an individual can quickly and easily build and install a full ramp system. Instructions are included that provide ADA guidelines, handrail options, and cut lists for the required lumber. A truly economical option that is easier than designing from scratch in all wood.
